2.5 yrs in production | **~1,500** units / month | **3 workshops** ~180 operators | **HSK 4+** Chinese

SUMMARY

Owns production planning and progress at a Chinese-managed smart-locker plant (metal, paint and assembly workshops), reporting directly to the Factory Manager. Previously ran my own computer and laptop business for 4.5 years. Works in Chinese daily; built the plant's MES to manage production on real-time data.

EXPERIENCE

WEBOX VIETNAM

04/2024 – present

Assistant to the Factory Manager — Production Management

Smart lockers and OEM cabinet components · ~250 people · 3 workshops · Vietnamese–Chinese plant

Planning & progress

- Own order-based production planning and progress across metal → paint → assembly → shipping: ~10 orders and ~1,500 smart lockers a month, plus OEM component orders.
- Allocate daily work to three workshops (~180 operators) through 22 supervisors and team leaders; resolve issues on the spot and escalate to the Factory Manager when needed.
- Follow orders through to delivery; report production status to the Factory Manager and management.

Process & people

- Standardised forms, SOPs and production data recording; apply 5S and Kaizen within the plant's ISO 9001 system.
- Train new operators; coach mid-level supervisors on planning, progress tracking, issue handling and reporting.
- Resolve cross-functional issues with Warehouse, HR, Quality and IT; relay requirements in Vietnamese and Chinese.

Digitalising production management

- Built the internal MES: plan and progress of all three workshops on one screen, not a day-late manual report.
- Designed the semi-finished warehouse system for 1,100+ codes (of 5,000+): real-time stock and location.
- Digitalised attendance and output reconciliation by team — no more one-person manual Excel work.
- Run the plant's IT infrastructure: PCs, LAN, printers, cameras, server.

OWN BUSINESS — COMPUTERS & LAPTOPS

2019 – 2024

Founder · Operations

Founded and ran a computer and laptop sales and repair business: purchasing, sales and technical service.

SKILLS

Production management	Production planning · Progress control · Order management · Work allocation · Training
Improvement & quality	5S · Kaizen · SOP · ISO 9001 · Root-cause analysis
Data & tools	Excel · SQL · MES · Warehouse control · Python

LANGUAGES

Vietnamese	native
Chinese — HSK 4+	meetings, documents and two-way interpreting with Chinese management
English	work and technical reading

EDUCATION

Ho Chi Minh City University of Technology and Education · Industrial Electronics Engineering · Graduated 09/2019

PERSONAL PROJECT

In progress: AI-driven 3D design automation (AI agent ↔ SketchUp via MCP). Details: phandinh.site
